321 Power Series

Connecting The World, Empowering The Future.

Adaptive design for versatile layouts in 5G infrastructure, encompassing communication base stations, repeaters, RF remote units (RRU), robust security systems, smart devices like video surveillance and IoT, relay equipment for digital TV broadcasts, and outdoor power supply for diverse electronic equipment.

Model	Overall Size (W*H*D)	Inner Size (W*H*D)	Weight (kg)
AY321-30W	**321*244*135mm**	**300*210*80mm**	**5.5**

Standard Parameters

Brand	**AY**	Color	**Silver Grey**
Series	**Power/321**	Surface Treatment	**Electrostatic Spraying**
Name	**Outdoor Aluminum Enclosure**	Material	**Aluminum**
Protection Level	**IP67**	Processing Methods	**Die Cast Aluminum**
Impact Resistance	**IK10**	Installation	**Pole/Wall Mounting**
Operating Temperature	**-40±3℃~+105±2℃**	Operating Humidity	**≤90%RH**
Operating Voltage	**AC100~AC250V**	Operating Power	**20-50W**

Customizable Parameters

Color	**Grey, White or other colors**
Inner Structure	**Customizable**
External Interface	**Customizable**
Other Processing	**Tapping, Milling**
Personalized Customization	**Nameplate, Silk Screen, Laser**

321 Fan

Connecting The World, Empowering The Future.

Protection Level	**IP67**	Processing Methods	**Die Cast Aluminum**
Impact Resistance	**IK10**	Installation	**Pole/Wall Mounting**
Operating Temperature	**-40±3℃~+105±2℃**	Operating Humidity	**≤90%RH**
Operating Voltage	**AC100~AC250V**	Operating Power	**20-80W**

Customizable Parameters

Color	**Grey, White or other colors**
Inner Structure	**Customizable**
External Interface	**Customizable**
Other Processing	**Tapping, Milling**
Personalized Customization	**Nameplate, Silk Screen, Laser**

564 Power Series

Connecting The World, Empowering The Future.

Adaptive design for versatile layouts in 5G infrastructure, encompassing communication base stations, repeaters, RF remote units (RRU), robust security systems, smart devices like video surveillance and IoT, relay equipment for digital TV broadcasts, and outdoor power supply for diverse electronic equipment.

Waterproof

Anti-interference

Heat Dissipation

Corrosion Resistance

Lightning Protection

Modular installation

Dimension

Model	Overall Size (W*H*D)	Inner Size (W*H*D)	Weight (kg)
AY564-360W	**564*424*165mm**	**540*400*100mm**	**17**
AY564-430W	**564*424*202mm**	**540*400*125mm**	**19**
AY564-500W	**564*424*240mm**	**540*400*150mm**	**22**

Standard Parameters

Brand	**AY**	Color	**Silver Grey**
Series	**Power/564**	Surface Treatment	**Electrostatic Spraying**
Name	**Outdoor Aluminum Enclosure**	Material	**Aluminum**
Protection Level	**IP67**	Processing Methods	**Die Cast Aluminum**
Impact Resistance	**IK10**	Installation	**Pole/Wall Mounting**
Operating Temperature	**-40±3℃~+105±2℃**	Operating Humidity	**≤90%RH**
Operating Voltage	**AC100~AC250V**	Operating Power	**20-600W**

Customizable Parameters

Color	**Grey, White or other colors**
Inner Structure	**Customizable**
External Interface	**Customizable**
Other Processing	**Tapping, Milling**
Personalized Customization	**Nameplate, Silk Screen, Laser**

564 Fan Power Series

Connecting The World, Empowering The Future.

Adaptive design for versatile layouts in 5G infrastructure, encompassing communication base stations, repeaters, RF remote units (RRU), robust security systems, smart devices like video surveillance and IoT, relay equipment for digital TV broadcasts, and outdoor power supply for diverse electronic equipment.

Product Description

Cast aluminum is molten aluminum poured into the mold, the aluminum alloy body is formed at one time. The toughness of the cast aluminum material provides high-strength impact protection for the cast aluminum chassis.

Product Features

Good Heat Dissipation

High Efficiency Cooling Fin Design

After absorbing the heat, the heat sink dissipates the heat. There are large-area radiating fins on the front and back of the shell, which has good thermal conductivity.

Safe and Reliable

Surface covered with pure polyester fluorocarbon super weather resistant coating.

High-quality raw materials are not afraid of the changeable outdoor environment.

Design life of more than 20 years to provide professional guarantee for equipment.

Signal Interference Does Not Exist

Ingenious molding structure, significant electromagnetic shielding characteristics.

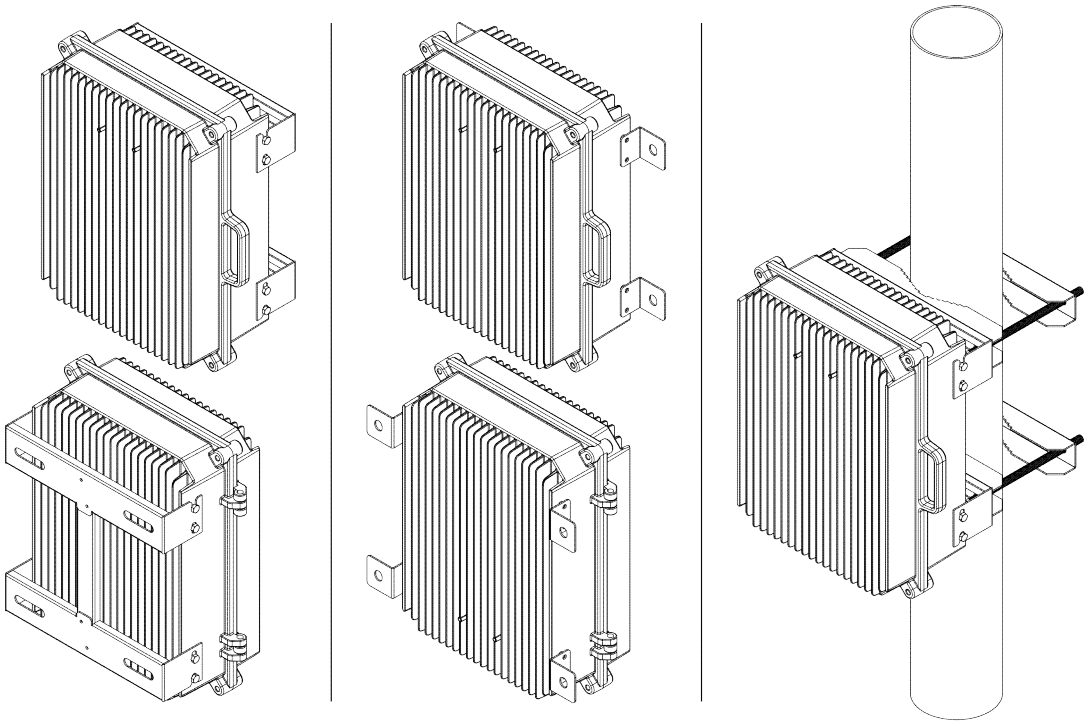

Anti-EMP electromagnetic pulse surge.

High Protection Grade

Since there are no shutters, foreign objects and dust are completely prevented from intruding.

Protection level IP68/NEMA6.

Installation

Wall-Mounted Installation 1

Wall-Mounted Installation 2

Pillar Installation

Different installation parts can be purchased for pole, wall or floor installation.

The same box can meet the construction needs of different installation scenarios at the same time.

All box can be done with fan.
